Art Unit: 2653

- 1) The amendment filed 8/21/2003 is acknowledged.
- 2) Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 1 recites " each pit corresponding to a form of control for access to the entire data storage medium " (claim 1, lines 6-7) in unclear and cannot be understood since this feature was not support by the specification. As seen in the specification, page 8, lines 21-22 states that " the UCDA contain single pit fields, where each pit specifies an access control attribute ". Further, in page 9, lines 7-11 states that " Specific UCDA pits may, for example, disable writing within the DCB area of the lead-in and lead-out areas, disable ... and so forth " but that does not means " each pit corresponding to a form of control for access to the entire data storage medium " as claimed.

b) Claim 1 further recites " a data area that includes information for control of access to regions (plural) of the data storage medium, wherein a region is less than the entire data storage medium " in unclear and cannot be understood since this feature was not support by the specification. No places in the

Art Unit: 2653

specification describes " a data structure " comprising " a data area " as recited in claim 1.

3) Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.

Applicant states that claim 1 is original claim 5 in the parent application and has never been amended. This may be true and claim 1 is now rejected under 35 U.S.C. 112 2nd paragraph as being unclear as indicated above.
